Exam Scale Marks Scale By: Course

Using Algorithm: Target Ave and St Dev Multi-Linear Mapping

Target: Avg 47.0 StDev 12.5

Statistics: Task Avg 54.2 StDev 9.7

Student Name	Class	Mark Raw	Out Of	Estimate**	Exclude	Mark %	Mark Scaled	Class Rank	Task Rank	Comment
Al Ghardaqa, Nancy	12EA6	61	70	<input type="checkbox"/>	<input type="checkbox"/>	87.14	55.8	4/10	12/40	
Allnutt, Andrea	12EA5	70	70	<input type="checkbox"/>	<input type="checkbox"/>	100	67.3	1/5	1/40	
Anderson, Alexia	12EA4	60	70	<input type="checkbox"/>	<input type="checkbox"/>	85.71	54.5	4/10	15/40	

Enter a target minimum and maximum, the software then looks at what the raw mark minimum and maximum are, and scales the student's mark by the appropriate factor.

For example, if you have raw marks with minimum of 25 and maximum of 40, and you want to scale them to a minimum of 50 and a maximum of 80, then the appropriate scale factor would be two.

Results are calculated as follows:

$$\text{scale Factor} = (\text{targetmax} - \text{targetmin}) / (\text{rawmax} - \text{rawmin})$$

$$\text{markScaled} = \text{targetmin} + (\text{ScaleFactor} \times \text{rawMark})$$

This is a direct linear scaling available in the current master.

The "multilinear mapping" (currently available on request) because in a couple of cases it's implemented with multiple bands like this (this is an *example* only, it is set up to have any number of bands with any range for each band).

Raw mark min	Raw mark maximum	Target minimum	Target maximum
0	20	50	60
21	30	61	70
31	40	71	90
41	50	91	100
