The preferred way to create new tasks is the "Import Markbook Tasks" from Spreadsheet function. The spread sheet must be in the format as shown above. (Excel template can be supplied) Fields Required (\* mandatory)- Assessment Year\*, Academic year\*, Assessment Term, Course Code\*, Class code, Task Name\* (once created can not be changed), Task Number\* (can only be changed via a button {script}), Mark Out of\* (can only be changed via a button {script}), Faculty\*, Task Assignment date\* and Due Date\*.

From the Markbook menu, click "Import Markbook Tasks from Spreadsheet" and Follow the steps below.

1. Click to Import Spreadsheet
2. Run the Validation Checks - Checks for incorrect data
3. Creates the Task from the Imported Tasks
4. Delete this data from this Markbook Task Import Assistant.

## Import Spreadsheet

Step 1 Importing the Spreadsheet. Check the box "Don't import first records" this will ensure the field names are not imported.

## Import Spreadsheet - Validation Check

**Instructions:**

1. Import from spreadsheet. This will bring the data in and display it to you in this list.
2. Proof the data. Any record with an orange highlight has an issue that the system has picked up. Error details are included in the columns below these instructions. Rectify them before proceeding.
3. If correctors were made, Run Validation Checks again to confirm they are cleared.
4. When confident data is correct, click the button at Step 3 to bring them into the system.
5. The posting status will be set to 'Created' when these have been created in MarkBook Tasks.
6. Please delete all from this assistant when the process is completed.

## Markbook Tasks

The screenshot shows the 'Markbook Tasks' interface for a 'Shakespeare Essay' task. The task is for the year 12, course 12EA, and class 12EA4. The task number is 1, with a total of 70 marks. The task was created by John Denbigh and is currently assigned to Ms V Grierson, Mrs J Grierson, Mrs A Holmes, Ms J Harry, and Mrs R Lam. The task is set for an assessment year of 2012, with an assignment date of 28/02/2012 and a due date of 3/03/2012. The reporting period status is 'No current report available'.

The student results table lists 40 students, each with their name, class, raw mark, out of 70, and estimated mark. The estimated mark for all students is 0. The table also includes columns for 'Mark Scaled', 'Class Rank', and 'Task Rank'. The 'Mark Scaled' column is currently empty for all students.

At the bottom of the interface, there are options to 'Assign to Student's Report' and 'Marks Destination' (Course Mark or Exam Mark). A note states: '\*\* Click the 'E' button to estimate a mark for a student. Enter the marks for all other students first. The estimation will be based upon the rank the student earned in previous tasks in this course. If this is the first task for the course, the computer will be unable to estimate a mark accurately.' The last recalculated by is 'at'.

Any fields appear in year in yellow are because the data is missing.

1. Check box to show they are Exam Marks
2. Scale Marks - will display Scaling options
3. Shows the current Reporting Period
4. Statistics of Tasks
5. Teachers of the classes
6. Padlock to lock the task
7. Assign Marks to the Students Reports
8. Check box of where the marks will be assigned

The screenshot shows the 'Markbook Tasks' interface. At the top, there is a navigation bar with icons for Main Menu, Back, Markbook Menu, View as List, Spreadsheet for Course, Find, Find All, Delete Task, Print, and Export Task to Excel. The task details for 'Shakespear Essay' are displayed, including the academic year (2012), course code (12EA), and task name. A table of class teachers is visible on the right. The 'Rapid Entry' button is highlighted with a red box.

When grading by Mark, as the example shows, students that get a mark A have a Mark that is the top 20% eg 100 to 80. Students that get a B have a mark in the next 20% eg 79 to 60. Students that get a C have a mark in the next 20% 59 to 40. Students that get a D have a mark in the next 20% eg 39 to 20 and E 29 to 0.

## Export Tasks to Excel - (End of year or beginning of year function)

The screenshot shows the 'Markbook Tasks' interface. The 'View as List' button in the top toolbar is highlighted with a red box. The main area displays details for a task named 'Shakespear Essay' (Task # 1, Out Of 70) for the course '12EA'. The 'Statistics' section shows a Task Avg of 54.2, StDev of 9.7, Min of 37, and Max of 70. The 'Student Results' section shows a table with columns for Student Name, Class, Mark Raw, Out Of, Estimate, Mark % (87.14), Mark Scaled (61), Class Rank (4/10), and Task Rank (12/39).

Go into a task and click to View as list.

The screenshot shows the 'Markbook Tasks - Current Tasks' interface. The 'Find' button in the top toolbar is highlighted with a red box. The main area shows a search form with fields for Assessment Year (2012), Academic Year (12), and Course Code (12EA).

Click Find; enter the Assessment Year, Academic Year and the Course code.

The screenshot shows the 'Markbook Tasks - Current Tasks' interface. The 'Export Task List to Excel' button in the top toolbar is highlighted with a red box. The main area displays a table of current tasks:

Exam  Scale Marks  Scale By: Course Using Algorithm:  Target Ave and St Dev  Multi-Linear Mapping Avg 47.0 StDev 12.5 Target Task Avg 54.2 StDev 9.7 Statistics Min Max Min Max

Reporting Period Status: No current report available.

Student Name	Class	Mark Raw	Out Of	Estimate**	Exclude	Mark %	Mark Scaled	Class Rank	Task Rank	Comment
Al Ghardaqa, Nancy	12EA6	61	70	<input type="checkbox"/>	<input type="checkbox"/>	87.14	55.8	4/10	12/40	
Allnutt, Andrea	12EA5	70	70	<input type="checkbox"/>	<input type="checkbox"/>	100	67.3	1/5	1/40	
Anderson, Alexia	12EA4	60	70	<input type="checkbox"/>	<input type="checkbox"/>	85.71	54.5	4/10	15/40	

Enter a target minimum and maximum, the software then looks at what the raw mark minimum and maximum are, and scales the student's mark by the appropriate factor.

For example, if you have raw marks with minimum of 25 and maximum of 40, and you want to scale them to a minimum of 50 and a maximum of 80, then the appropriate scale factor would be two.

Results are calculated as follows:

$$\text{scale Factor} = (\text{targetmax} - \text{targetmin}) / (\text{rawmax} - \text{rawmin})$$

$$\text{markScaled} = \text{targetmin} + (\text{ScaleFactor} \times \text{rawMark})$$

This is a direct linear scaling available in the current master.

The "multilinear mapping" (currently available on request) because in a couple of cases it's implemented with multiple bands like this (this is an \*example\* only, it is set up to have any number of bands with any range for each band).

Raw mark min	Raw mark maximum	Target minimum	Target maximum
0	20	50	60
21	30	61	70
31	40	71	90
41	50	91	100
